

Project Announcement

The Great International Green Globbs Contest

Time Frame: May 22 - June 6 2008

Website: <http://DMCpress.org/gg/>

Description: Students combine computer game fun and serious mathematics in a face-off of the "Green Globbs Contest." After learning about coordinate graphs and equations in math class, students put their knowledge to work by going after the highest score on a posted Green Globbs array. Highest scores will be posted on the contest website. You can use the current posting of arrays to prepare for the contest. The official contest challenges will be posted on 6/2/08.

Software needs: Green Globbs and Graphing Equations (PC & Mac OS 10.5 versions) available from <http://www.greenglobs.net> However, you can compete without the software by downloading the score sheets with screen shots from the contest website <http://DMCpress.org/gg> and submitting your equations by email to globscontestcentral@mac.com

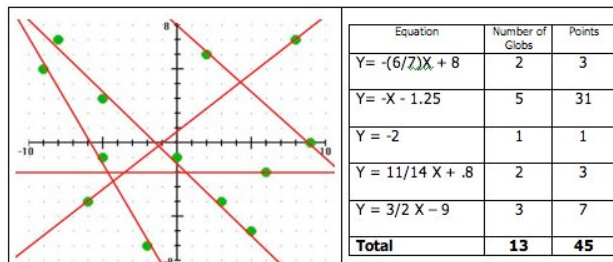

Tags: Algebra, graphing, linear, non-linear, functions, curves analytical geometry

Time frame:

May 22 - June 2: Prep for Contest

June 3 to 6: Contest

Grade Level: 6-12

Sample novice game*

Registration Information: Registration is now open. There is NO FEE required to join this project. If you are interested in participating, please send me an email to globscontestcentral@mac.com
