

# AQUATIC PEACE - BRINGING CALM INTO THE OFFICE

In our high paced, high demand work world today, often customer wait time, in terms of their opportunity costs, is ignored while overbooked schedules back up the waiting room and 3 month old magazines are glared at. Customer stress can equal a lost customer.

At Aquatic Peace - we bring a world of visual pleasure and relaxing aquatic life into the work place.

Our Aquatic Peace staff will install and maintain a soothing aquatic system for employees and clients to enjoy while in a

waiting room or client viewable working environment. The same places that a simple blank wall or piece of still art can accomplish little beyond boredom.

We offer leased tanks, custom tanks and even general service of personally owned tanks. And we promise stress reduction of staff and clients with the healthy and vibrant beauty of an intoxicating underwater world.

Our tanks can be customized in color and content to match your office needs.

Fresh water, salt water and reef systems are available. Service

times are designed around your schedule and with our licensed and staff we can service your tank safely and securely behind the scenes without interfering in daily operations.

Pricing is another of the flexible features we offer. At a minimum of both cost and your efforts we will visit the tank once a week. This may require a nominal effort from your staff with training we provide. Other care plans can limit your efforts to observation only.
