

Purpose

and Procedures

The purpose of the summer math assignment is to review the concepts taught by your teachers in your previous math courses. The math department feels strongly that by strengthening your understanding of past lessons, you will be ready to tackle the new concepts when school begins.

All summer math assignments are intended as REVIEW for the math course that you completed in the 2008/09 school year.

This year, we are offering several options for students to choose from based upon their time constraints.

On the first day of school, each student must turn in proof that she completed one of the summer math options. This must be an official certificate of completion or, in the case of Aleks / Summer Online Learning Experience, a print-out displaying more than 70% mastery of the content skills.

The summer math assignment will count for 10% of the first quarter grade.

Summer Math Assignment Based upon the course most recently completed:

8TH GRADE MATH:

One week Summer School Course
Aleks / Summer Online Learning Experience
Summer Skills Math Strengthener - PreAlgebra

ALGEBRA I

1 ½ Week Algebra Camp on SAA Campus
Aleks / Summer Online Learning Experience
Summer Skills Math Strengthener - Algebra

GEOMETRY

1 ½ Week Algebra camp on SAA Campus
Aleks / Summer Online Learning Experience
Summer Skills Math Strengthener - Geometry

ALGEBRA II AND ABOVE

Aleks / Summer Online Learning Experience
ACT Review Test Packet from your teacher.
