The Fort Worth Water Department recently acquired the responsibility for Real Property Management Services at Lake Worth. Audra Gustafson, who has been the Land Agent in charge of Lake Worth leases and sales, has been transferred to the Lake Worth Management Office. Effective September 2, 2008, she will assume the duties of the Lake Worth Coordinator. In addition to her duties as land agent she will also be responsible for managing all customer service issues at Lake Worth. The Water Department feels that this consolidation will result in better customer service for our Lake Worth customers. Walter Hardin, who previously managed the Lake Worth Office, has been reassigned to perform duties as project manager and senior engineer for various water, sewer and lake maintenance projects in the Lake Worth area. In addition Walter will be responsible for watershed management and water quality programs at Lake Worth.

Please feel free to post this information to your associations website or distribute it to your membership.

Paul S. Bounds
Environmental and Regulatory Coordinator
Fort Worth Water Department

From the Lake Worth Alliance: We've been told that there could be further changes and consolidation of city-owned physical assets on the Lake. Keep In touch for forthcoming information.
