

Our Brain Team

Regions of the Human Brain

The **LOBES** in each half of our brain control different things. They are part of your brain team.

PARIETAL LOBE: speech, sensory signals.

OCCIPITAL LOBE: vision.

FRONTAL LOBE: personality, reasoning, speech, muscles.

TEMPORAL LOBE: hearing, speech, understanding stuff.

FUN FACTS

Your nerves can send signals at more than 200 miles per hour!

Your brain is 80% water!

Your brain stops growing when you are 15, but learning never stops!

Your brain uses as much power as a 10-watt light bulb!

Your brain has between 10 billion to 100 billion nerve cells.

Each nerve cell in your brain can have up to 250,000 connections to other nerve cells!

Scientists have learned more about the brain in the last 10 years than they did in the last 100 years thanks to technology!

Scientists say that if you do something twice it can double your ability to remember it!
