OBJECTIVE

Challenging work in the field of architecture, Interiors, Graphics & Urban Design.

EXPERIENCE

Laborer, Burkhart Construction Summers 1974 & 1975

In my view it is very important for a practicing architect to have worked construction, and to have gone out to a job site and swung a hammer. To understand what goes on in the field is paramount to functioning as an architect. This also included many hours with my father building my parent's home in Kalaheo, Kaua'i.

Laborer, Pacific Fabrication Summers 1979-1980

I spent the summer 80 feet in the air removing the existing corrugated metal roof on the McBride Mill in Ele'ele Kaua'i, and replacing it with a standing seam metal roof. The following summer I worked at their shop here in Honolulu.

Student Help, Wood Shop University of Hawai'i Art Depart. 1981-1982

During my time at the University, I worked at the Art Departments Wood Shop teaching students to use various machine tools from table saws to panel saws, drill presses, jointers, planers, and radial arm saws.

Designer Draftsman, Alan Shintani, Inc 1983-1985

At Alan Shintani's Contruction Company I worked both on the boards and in the field, and got to see my designs get built; and more importantly to meet a budget. I also got to do a bit of estimating. I learned the ins and outs of design for both residential and commercial work, putting together a full set of working drawings, permit routing, and Zoning requirements through the City & Country of Honolulu. A great learning experience.

Intern Architect, Jay Anderson & Assoc. 1986-1987

My first experience working for an architectural office. The work here was primarily centered around Military, City & Country and State Projects.

Intern Architect, The Gulstrom Kosko Group 1986-1990

Probably the best office I have had a chance to work with. A great learning experience. I was basically given my own projects, with minimal supervision, and allowed to take these projects from the Design Phase on through to Construction Management. A great stepping off point to running my own business.

Architect, Dux Architects LLC 1990-Present

For the last 17 years I have had the pleasure of running my own architectural firm. The projects vary from small renovations & additions, to new multimillion dollar homes, all mixed in with a spattering of commercial work.

EDUCATION

1977 Kaua'i Community College

Associate Degree in Architectural Drafting & Design

1989 University of Hawai'i School of Architecture

Bachelor Degree in Architecture
